

Artificial Intelligence - What sort of future are we creating?

Artificial intelligence is rapidly changing how we work, communicate and live, bringing potential benefits such as advances in healthcare and greater prosperity. But there are also concerns about job losses, human autonomy and even the existence of humanity itself.

Our panel will explore some of the key questions from a Christian perspective, with each person bringing their own area of expertise to the discussion:

- Rev Dr Jason Askew (Theology and ethics)
- Mr Tim Dale (Technology)
- Dr John Northfield (Healthcare)
- Professor Malcolm Prowle (Economics)

Everyone is welcome to join.

Sunday 11 October | 6pm

Ysgol Gymraeg y Fenni, Llwynu Lane (formerly Deri View)
